Review of the Saigon Rice Market-1867. (From Mesers, W. G. Hale & Co.'s Market Record). Salcon, 31rt December, 1867. The senson commences in December, but supplies thering that month are small, and the business dres not. fairly begin until January, from which month the Exports are computed. Hice is sold by the picul of 131 lbs. English gross neight bayged (in mots) and delivered alongside the resect. Payment is made usually, one half in adennee and the balance on delivery of the Rice.

The crop of last senson was the largestyetproduced, and the exports show an increme of 1,055,124 Piculs over last year. The bulk, as usual, was shipped to China, but the low prices here, induced several shipments to Europe and Mauritius; the results of which are natisfactory. The business with these places, has, in a measure compensated for the very unsatisfactory state of trule with China, which has been so discouraging, that Europeans have done but little, while Chinese have been great losers. Several vessels have also louded direct for Javan, and one small cargo has just been cleared for Syd-Aron ney, being the first over shipped direct to Australia. The first contracts entered into, were at \$1.60 per pical, but this price was not maintained, and tour January to the middle of June, there was a in the steady decline to as low as \$1.03 per picul, after parcel which however, prices again advanced, owing to the of the demand springing up for Europe and Manritius ame de and in July, some prechasers (who were somewhat ppear to too eager) paid as high as \$1.40 per picul. When There the first of this demand was satisfied, the article

ess ware again declined in value, and from August to Decem-

18 9.2.85 picul for good cargo, the season closing at \$1.22 per picul for the best descriptions now obtainable, which

her, the average price has been about \$1.25 per

are in demand for shipment to Europe. Stocks of last season's production are however. rearly exhausted, or prices would have been much, lower, the advices from China being very discourage. ug for shipments to that quarter. The Crop of this year is reported to be a very abundant one, though owing to the rainy season having been rather late, it is not expected that the feld will prove as large as that of last year. The Chinese are stready cager to enter into Contrucis, and sales have taken place for delivery in January at \$1.26 per pieut. Should the demand for China be as moderate as is now anticipated, prices here must rule unusually low, and it may therefore doubthes he expected that cargoes, can be obtained from this at least as cheap as those from any other Bice port. We should here observe that owing to the proximity of this port to Hong kong and Singapore vessel, se, in the can always be obtoined at either of those places, to disfactory load for Europe, at rates considerably below those which have to be paid for more distant Rice ports. Tonnage. The returns of this year shew a considerable increess in the amount of torrage which much do has found employment here. In all 145 vesse's= has been 1,304,750 piculs were chartered, a great number of

bick were originally engaged at Hongkong, by speculators. Freights has been good throughout ie year, rates to Hongkong averaging 41 cents per njeut for vessels muler, and 38 cents per pleut for vesse's over 10:00) piculs capacity. To the United Kingdom £3.10 per ton was paid for a small vessel, while for those taken up at Hongkong and Singapore, rules have ranged between £3 and £3/15 per ton. To France 4 yearels have been fixed at from and 1,000 Singapore the butk of the trule has been done as usual, by vessels belonging to that port, but still, 16 Foreign vessels have obtained cargoes at rates averaging 214 cents per picul.
